## PROJECTS

- **JACKETT – Modern Torrent Proxy Web Interface**  
Developed a modern, responsive web interface for the Jackett torrent indexer using **Vue.js 3 and TypeScript**. Built a user-friendly frontend to search torrents across multiple indexers via Jackett's API, improving usability, mobile support and overall user experience while maintaining full API compatibility.
- **FOOD APP – Online Food Ordering Website**  
Developed a dynamic food ordering web application with user-friendly navigation and real-time order tracking to enhance the online dining experience.
- **Wi-Fi Controlled Smart Car using Blynk**  
Designed and implemented an internet-controlled smart car system using **ESP32** and the **Blynk mobile app**, featuring remote control and automatic smart headlights using LDR sensors.  
Technologies used: ESP32, LDR sensors, L298 motor driver, LEDs, batteries and embedded hardware components
- **.I-NOTEBOOK – Online Notes Management System**  
Built a responsive notes management web application with secure user authentication and full **CRUD** functionality, enabling efficient and secure note storage and management.
